DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9 and 13-20, drawn to a conductive sheet, connector and probe.

Group II, claim(s) 10-12, drawn to a method of making a conductive sheet.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is the anisotropically conductive sheet with a DLC film formed on the surfaces of the conductive sheet. The element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. JP 2002-208447 shows an anisotropically conductive sheet wherein surfaces are covered with a metal coating to prevent the generation of static electricity. As illustrated in JP 11-307782 it is known in the art that DLC films also have properties that prevent the generation of static electricity and to coat insulating-type layers with DLC type films. It would have been obvious to one of ordinary skill in the art to substitute the metal

antistatic layers of JP 2002-208447 with the DLC coating of JP 11-307782 for the purposes of preventing the generation of static electricity.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
